117 Traumatic Injury Extrication

Have you ever received a call for a subject stuck in an HVAC vent, a wedding ring stuck on a finger, or even a motorcycle accident victim impaled on a signpost? The rescuer often finds difficulty in approaching these situations simply because of the unknowns. This class will bring a new perspective to this type of incident. Instructors will provide “out of the box” ways of thinking that are usually not incorporated with normal fire service operations. This different train of thought will help the student develop a framework of techniques and tools that will make this operation smooth and safe. At the end of this class the student will be confident in proper tool choice for these incidents and able to operate with confidence on scene. This class focuses on hands-on training using many different types of cutting tools to complete extrication scenarios.

PRE-REQUISITES/EQUIPMENT NEEDED

Safety glasses, helmet, turnout coat & work gloves.

This 3-day course will be offered Friday-Sunday.

Lead Instructor: Will McKenzie, State Fire Rescue Training District 9
